***Specification***

The examiner has not checked the specification to the extent necessary to determine the presence of **all** possible minor errors (grammatical, typographical and idiomatic). Cooperation of the applicant(s) is requested in correcting any errors of which applicant(s) may become aware of in the specification, in the claims and in any future amendment(s) that applicant(s) may file.

Applicant(s) is also requested to complete the status of any copending applications referred to in the specification by their Attorney Docket Number or Application Serial Number, **if any**.

The status of the parent application(s) and/or any other application(s) cross-referenced to this application, **if any**, should be updated in a timely manner.

***Claim Rejections - 35 USC § 103***

The text of those sections of Title 35, U.S. Code not included in this action can be found in a prior Office action.

This application currently names joint inventors. In considering patentability of the claims under 35 U.S.C. 103(a), the examiner presumes that the subject matter of the various claims was commonly owned at the time any inventions covered therein were made absent any evidence to the contrary. Applicant is advised of the obligation under 37 CFR 1.56 to point out the inventor and invention dates of each claim that was not commonly owned at the time a later invention was made in order for the examiner to

consider the applicability of 35 U.S.C. 103(c) and potential 35 U.S.C. 102(e), (f) or (g) prior art under 35 U.S.C. 103(a).

Claims 1-33 remain rejected under 35 U.S.C. 103(a) as being unpatentable over CN 1382631 cited by applicant, for the reasons set forth in the office action of February 14, 2008.

### ***Response to Arguments***

Applicant's arguments filed June 16, 2008 have been fully considered but they are not persuasive.

The examiner notes the filing of the certified translation of the priority document for the instant application. However, this submission is insufficient to overcome the rejection because the herein claimed limitation of an "initial unit cell constant is 2.440-2.465nm, and after being aged under severe conditions of 100% steam at 800°C for 17 hours, the equilibrium unit cell constant remains greater than 2.435 nm" as set forth in the instant application is not present in the priority document, and cannot be reasonably concluded from the disclosure set forth therein. Accordingly, the earliest filing date for the instant application is October 28, 2003, which is antedated by the effective publication date of the CN document, which is December 4, 2002.

### ***Conclusion***

**THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
